

PELICAN 5LB ICE PACK – MAXIMUM POWER FOR MAXIMUM COOLING

Dominate longer trips and larger loads with the Pelican 5lb Ice Pack, proudly made in the USA and engineered as the ultimate cooling solution for serious adventurers. This premium ice pack delivers professional-grade performance for Pelican's hard-sided Elite Coolers, keeping contents colder longer when it matters most.

COLDER THAN ICE

Freezing at 28.4°F (-2°C)—well below traditional ice—these packs maintain lower temperatures longer, ensuring your contents stay fresher and colder throughout extended adventures. So cold, in fact, that regular ice will freeze to its surface, creating an enhanced cooling zone inside your cooler.

SMART DESIGN, MAXIMUM EFFICIENCY

The flat, low-profile design maximizes surface contact area with your cooler's contents, accelerating the cooling process and distributing cold more evenly. With 5 pounds of freezing power, this pack provides extended cold retention for multi-day trips, large gatherings, or when you simply refuse to compromise on freshness.

ELITE COOLER COMPATIBILITY

As the largest option in the Pelican Ice family, the 5lb pack is specifically engineered for Pelican's hard-sided Elite Coolers ranging from 20QT to 250QT. Perfect for serious expeditions where reliable, long-lasting cooling is non-negotiable.

- Heavy-duty 5lb size – maximum cooling power for extended adventures
- Made in USA – American-made quality and craftsmanship
- UV-protective shell – withstands harsh outdoor conditions
- Safe materials – non-toxic, BPA-free, FDA-approved construction
- Elite Cooler fit – compatible with 20QT–250QT hard-sided Pelican Elite Coolers
- Lifetime warranty – Pelican's legendary durability guarantee
