

For 50 years, Pelican has been trusted to protect what matters most in the harshest environments on Earth. Now, that legendary protection expands with the Aegis 30" 4-Wheel Rolling Duffel—delivering uncompromising security for those who travel further and carry more.

This isn't just another check-in bag. The Aegis 30" combines Pelican Shield™ protection with 90 liters of organized capacity—our signature EVA molded front shell that defends your belongings from drops, pressure, and the unexpected—engineered for travelers whose missions demand both maximum protection and maximum space. It's the perfect companion to our ATX hard-sided luggage: choose the capacity you need when the journey requires it, choose the protection you trust when failure isn't an option.

Where traditional oversized duffels leave your gear vulnerable, the Aegis stands firm. Where you need the confidence of Pelican-grade protection for extended expeditions, the Aegis delivers. This is hybrid engineering at full capacity: the resilience of Pelican, scaled for the missions that matter most.

- Four Hinomoto 360-degree spinner wheels
